about

3rd year Computer Science and Mathematics student at the Hebrew University.

Diligent and a fast learner, have high drive to learn and develop my programming skills.

I am seeking a position in software engineering and Related field that allows me to contribute to developing innovative and efficient software solutions.

Education

2020 – 2021

Preparatory program

The Hebrew University of Jerusalem

2021/10 – present

B.Sc. in Computer Science and Mathematics

The Hebrew University of Jerusalem

Expected Graduation: September 2025

Skills

Coding languages:

Python, Java, C, C++

Computer Science:

Data structures , Algorithms, ML

Projects

Hackaton ML - Hebrew University

My team and I built a functional model and processed data. The project involved collaborative problem-solving, data analysis.

Nand to Tetris Course

Completed a comprehensive course where I built a computer from scratch. Developed a deep understanding of hardware, assembly language, and computer architecture.

Languages

Hebrew | English
